

# EAA Chapter 202

## Minutes of the January 2003 meeting:

Meeting called to order by the Pres, Hal Hadler, Following the pledge Hal formally turned the gavel over to the incoming President, Dick Smith.

Dick assumed the roll of President of EAA Chapter 202.

First item of business was to address the clubhouse roof. The good news is it keeps out 99.5% of the rain. Bad news is the other .5% equals a lot of water leaking into our building. Following discussion Mr. Cooper agreed to head a committee to evaluate the roof situation and recommend a solution. Mr. Cooper asked for volunteers to contact him to meet and discuss the problem. His phone number is 871 2722.

The Cubby situation was discussed at length. Synopsis is the wings could be ready for covering with a couple of hours work. It was agreed that following the next meeting all members are asked to team up and begin the process of covering. [Make your plans to be there and become part of the rag wing gang.](#)

Young Eagle flights are to be resumed in March of this year. Vance is working with the EAA National office and has spoken with Precision FBO for use of their facilities. Tentative date is the meeting weekend in March. We will need volunteers to serve as ground crew/instructors as well as the pilots and aircraft. As the program progresses more information will be available and reminders will be issued. [Mark your calendars for this most important day. If one youngster is motivated to become an aviator we will have done our job.](#)

Following the meeting those members with written kitchen passes were invited to the East side Hangars to view members projects such as Bob's Glassair, Hal's Renegade, Steve Dun's Bird Dog. Photos available

**Last item of business is DUES ARE DUE. \$35.00 FOR MEMBERS BUT ONLY \$15.00 FOR NEW MEMBERS.** Let's try to bring in some new blood to do all the work.

Next month Breakfast will be served, Chief cook will be Rubert Cooper. Eggs, pancakes, bacon, juice etc. will be served.

# Field Trip Photos

Bob Stark and his award winning Glassair.

Steve Dunn and his Bird Dog complete with missile launchers.

Hal and his biplane.

Hal is explaining the best way to steal the dog's dishes to be welded into a oil sump.

Now that is experimental!
